

## Level 1

Six oranges fit into a medium box. A small box holds  $\frac{1}{2}$  that many. A large box holds double the number of oranges of a medium box. I buy one small and two large boxes. How many oranges will I get?

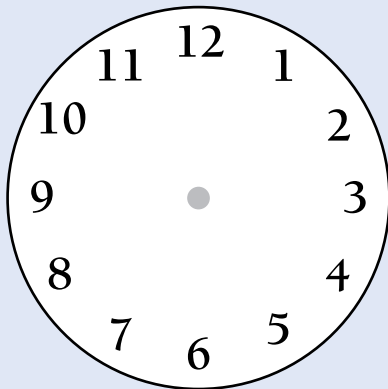

## Level 2

I have 3 coins that total less than 50 cents. Two of the coins are the same. What three coins might I have?

## Level 3

Draw a line on a clock face so that the numbers on both sides have the same total.

## Level 4

**9 8 7 6 5 4 3 2 1**

Place addition signs between the digits of the number 987654321 to create an addition equation with an answer of 99 (the digits must remain in order).
